

PRATHAM JADWANI

Frontend Engineer — Flutter & React | B.Tech CSE Student

jpratham9716@gmail.com | 9722768555 | Surat, India | [linkedin.com/in/pratham-jadwani-a5b19225a](https://www.linkedin.com/in/pratham-jadwani-a5b19225a)

PROFILE

Frontend-focused Full-Stack Developer specializing in Flutter and React, with a track record of independently designing, building, and shipping production websites end-to-end — from UI architecture to deployment. Comfortable owning a project from a blank repo to a live client-facing product, with a strong eye for responsive, animation-driven interfaces. Uses AI-assisted tooling deliberately to move faster through boilerplate and testing without cutting corners on code quality.

SKILLS

- **Frontend:** Flutter, Dart, React.js, HTML5, CSS3, Vite, Framer Motion, GSAP
- **Languages:** JavaScript, TypeScript, Dart, Java (DSA), Python, SQL
- **Backend & Database:** Node.js, Express.js, Firebase, MySQL
- **Tools & Workflow:** Git, Postman, AI-assisted development workflows (Copilot/Claude for scaffolding & debugging)

PROJECTS

Dada Design Studio — Portfolio Website | Live, Solo-Built

Jan 2026

dadadesignstudio.in

- Independently designed and built the full production website — from scratch to deployment — for a live architectural firm client (Architect Himanshu Boraniya), with zero external dev support.
- Built a visually immersive, animation-driven UI to showcase architectural portfolios, with a fully responsive layout tested across desktop, tablet, and mobile breakpoints.
- Used Vite for the build pipeline to keep load times fast and animations smooth, and structured the codebase for easy content updates by a non-technical client.

CharuVani — Video Conferencing App | In Progress

Nov 2025 – Present

- Building a cross-platform Flutter app for CHARUSAT University to support virtual classrooms and meetings, targeting low-latency video/audio for large student groups.
- Implementing real-time communication protocols with a focus on secure audio channels and interactive session/user management.

Ptunes — Offline Music Player App | Flutter/Dart, Solo-Built | In Progress

- Built a fully offline music player application in Flutter/Dart from scratch as a personal project.
- Implemented local audio playback, music library browsing, playlist management, and a modern user-friendly interface.

Designed and developed the entire application independently; currently running on my personal device and under active development.

Flutter Developer Intern | Iqonic Design

May 2025 – Jun 2025 | Surat

- Built and shipped UI components for live Flutter applications as part of a professional development team, working directly within an existing production codebase.
- Optimized responsive layouts across device sizes, improving consistency of the user experience across the app.
- Integrated Firebase for authentication, real-time database, and cloud storage, connecting frontend UI to live backend services.

EDUCATION

B.Tech, Computer Science and Engineering | DEPSTAR, CHARUSAT

Jul 2024 – Mar 2027 | Nadiad

- Relevant coursework: Machine Learning, Blockchain, Full Stack Development, Flutter Development.

Diploma | Bhagwan Mahavir University, Surat | Jul 2021 – May 2024 | CGPA: 8.78
